

Fold-and-Cut Chinese "Spring" Character (Pyramid Version)

Start with a square piece of paper. The side of paper you want on the outside should face up.

1

Fold in half-way horizontally, fold back, then hold in half-way vertically, fold back.

2

Flip the paper over (so the out-side of paper faces down). Fold in half-way diagonally and fold back. Repeat for the other diagonal.

3

Flip it over again, enforce the crease lines, and make it stand up like a pyramid. Now the outer-color side of the paper should be out.

4

Fold to half along the center line. Draw the pattern and cut.

5

Open it up and back to the pyramid form, and you're done.
